## Gossip

**Nadim– My daughter Liya has been wearing a “Mybrace,” a brace which is worn at night to correct the alignment of the teeth. She has only been wearing the 1st set for about 2 months and still has a little while to go. The photos above show the difference thus far, If you wish to know more then give us a ring on 01772 717316.**

**I will keep you posted on Liyas progress.**

**Sophie– Dominic finally gained his Chief Scout Gold, Whilst on his last Scout camp at County Rally Waddecar, he has now moved up into Explorer Scouts and is loving every minute of it. The fundraising to send the Scouts on a cultural trip to Croatia hots up. Chorley Healey Scouts will be the first Scouts from the UK to go to Croatia in August. Kris is continuing in his quest to find work. Lance has begun the invindulating again. Also enjoying this warmer weather may it continue. Im going to be out and about taking photos so look out for me. See you all next month.**

## Facial Aesthetics

As we get older, our skin often begins to show signs of aging— & our face can show the most noticeable effects. As well as our skin being exposed everyday to wind, sun, coldness & pollutant in the air, we use our facial muscles more than any others, that’s before we take into account stress, diet & hormones, which all play a part.

Our faces can make us look older than we feel, but we don’t have to put up with it. There are simple solutions available.

We are fully qualified to help you to restore and improve your skin using facial aesthetics treatment. There are two main options which can be used individually, or together for the best possible result.

\*Tackle lines & wrinkles caused by muscles moving beneath the skin. A liquid relaxant is used to reduce muscle movement, leaving smoother skin on the surface above.

\*Use biodegradable implants to fill lines, folds and wrinkles caused by loss of collagen. As well as making the face appear smoother, this technique can be used to make lips appear fuller & more defined.

In both cases, the treatment area is numbed with anaesthetic cream to avoid any pain, and patients experience only experience moderate discomfort while the fine needle is used. Unlike many cosmetic treatment, facial aesthetics are minimally invasive & do not require any recovery time. After a treatment lasting more than 30 Minutes, you can go straight back to enjoying normal life.

The full effects of the treatment will become visible five to ten days afterwards, & can last up to 6 months. Most patients have the injections renewed two or three times in the first year & one or two times annually thereafter. If treatment is not renewed, the correction will gradually degrade until the skin returns to its pre-treatment appearance.
